DETAILED ACTION

1. Applicant is advised of possible benefits under 35 U.S.C. 119(a)-(d), wherein an application for patent filed in the United States may be entitled to the benefit of the filing date of a prior application filed in a foreign country. Japanese Patent (2003-259683) published September 12, 2003 which indicates United States priority, Examiner advises Applicant again of benefits under 35 U.S.C. 119(a)-(d).

2. Claims 1-24 allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach alone or in combination using the NSSC (negative sequence stationary current) signal in the following:

Claims 1 and 19, using a signal conditioning circuit that combines the d-axis and q-axis NSSC (negative sequence stationary current) signal with a first positive feedback signal that is based on a rotor position estimate signal to generate modified d-axis and q-axis NSSC (negative sequence stationary current) signals.

Claim 10, signal processing the d-axis and q-axis NSSC (negative sequence stationary current) signal using a first positive feedback signal that is based on a rotor position estimate signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stacey (5140245) PMG-Based Position Sensor and Synchronous Drive Incorporating the Same and Nygren et al (6525504) Method and Device for Controlling the Magnetic Flux in Rotating High Voltage Electric Alternating Current Machine discloses subject matter related to the current invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tyrone W Smith whose telephone number is 571-272-2075. The examiner can normally be reached on weekdays from 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Nappi, can be reached on 571-272-2071. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
